

SANITARY EQUIPMENT COMPANY INC

February 3, 2011

To:

Members of the Legislature's Labor and Public Employees Committee

I am reaching out to you about HB-5460 it is very restrictive and quite frankly harmful to the way we have conducted business for the past 44 years. We feel that it would in fact endanger our employees as we all are a "family" and speak about all subjects in a very frank manner with each other. We have always regarded our employees as family and will continue to do so.

Ultimately this is a Constitutional violation of our basic rights. We will not stand for it! This is the United States not some dictatorship nation.

If you would like to talk about this feel free to contact me at my "Small Business, Minority Women, Owned Company"

Sincerely,

John Gregory
Vice President
